DANIEL FIGUEIREDO PARREIRA ROCHA

has successfully completed the online, non-credit Specialization

ChatGPT for Project Management - Leveraging AI for Success

This certificate equips professionals with the skills to harness the power of ChatGPT and AI for enhanced project management. Through this specialization, learners will master techniques to streamline both project planning and execution by using AI tools to decompose complex projects, organize tasks into structured timelines, and analyze risks and metrics. Participants will also develop advanced prompt engineering skills to efficiently generate precise project documents, strategic insights, and optimized workflows. By the end of this certificate, you will have the expertise to leverage AI in managing projects more effectively, ensuring success across various industries.

Jules White

Dr. Jules White
Professor
Department of Computer Science
Vanderbilt University

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
